

Executive Data Analytics Brief

Competitive Exam Student Stress & Diagnostics | Consulting Report

Project Overview

An end-to-end data analytics and statistical diagnostic study was conducted on competitive entrance exam candidates. This brief summarizes critical findings, statistical tests, and institutional recommendations.

Key Diagnostic Metrics

Metric	Observed Value	Strategic Interpretation
Total Candidates	250	Robust survey sample size
High Stress Rate	62.4%	Candidates scoring stress $\geq 8/10$
Avg Daily Study	6.5 hrs	Balanced average study allocation
Avg Nightly Sleep	6.0 hrs	Sub-optimal sleep across candidates
Institutional Care	0.0%	Complete void in counseling support

Top Strategic Recommendations

- Mandate Certified Mental Health Counseling across coaching centers.
- Deploy Rest & Sleep Protocols within online prep applications.
- Launch Community Mentorship Networks to combat severe isolation.
